===== REVIEW ===== I have been itching to play this game for a long time. I have been thinking about it for months and I finally got the chance to take it for a spin. What I find is that the game is pretty easy to get into. I had no problem at all getting into the game's storyline and was easily able to figure out how to solve the puzzles. I gave myself time to study the controls and other gameplay elements. Despite the fact that it is an easy game, there was a sense of pride that I had waited so long to play this game. It's interesting to think about. I have been a fan of the QD franchise for quite some time. I have a modest collection of QD games. I remember in the past purchasing a copy of the original Bonkey Trek game for my Amiga 1000 which was a little jewel in itself. I have wanted to take a look at the Bonkey Trek QD Edition for quite some time. I just never had the opportunity until today. Bonkey Trek is a pretty simple game for anyone that just wants a bit of puzzle solving to pick up and play. But there is enough depth and style in the graphics to keep you playing for hours and hours. I have to mention that I just love the way that the Bonkey Trek in the QD Edition uses

## **What's new in SpaceEngine - Mercury HD:**

**Supreme Court Term** When the Supreme Court faced off in a series of seven big cases this term, it decided how far the government can go in regulating liberty. In a central, public-broadcasting case the Court held that the federal government acted properly when it exercised regulatory authority over a private corporation, analogizing the case to the authority the government has over the U.S. Postal Service. In a taxation case it interpreted the Constitution to permit the IRS to impose an indefinite number of taxation rates to recoup a retirement fund that Congress had never authorized. In a deportation case, a state prisoner argued that the Court should overturn a federal court's ruling against police brutality. The justices refused, forgoing their opinions and leaving up to the District Court what relief the prisoner could seek. And in a ruling on search and seizure, the Court held that police need warrants before performing a search of your property. The high court was at its busiest and most trenchant in decades—protesters disrupted the Justices' private lives with demonstrations, the Court endured threats and ended its first year of the George W. Bush presidency with one of its most conservative terms. The justices are thus leaving office with new opinions and new controversies. The Sept. 29 oral argument began with President Bush delivering a State of the Union address. He told Congress he was keeping intact the tax cuts and budget cuts passed in the last five years. He asked the Democrats in the House and Senate to work with him on that issue. When a protester interrupted the president with impassioned debate over the Iraq war, Bush gave him two minutes to speak and sent him on his way—an indication of how seriously the Justices view the importance of setting a tone in criminal trials. But much of the year's biggest business took place outside the courtroom. This term's term bazaar was marked by the type of big change the Supreme Court has never had in its 20-plus years: the promotion of one of its relatively new conservative Justices to full life

**tenure. Justice Clarence Thomas assumed a post outside the court in an opinion in which he argued for “the striking of an historic balance: important federal interests, protected by official enforcement, are weighed against state interests that are protected by the rights under the Constitution.” It was his first major initiative as an established member of the Justices’ majority and it presaged many others that were to come. “He has an aggressive agenda,”**
